

Data Visualization

After completing Data Cleaning, we move to another essential element in any Machine Learning model cycle, i.e., Data Visualization.

We have many tools like matplotlib, Seaborn, Tableau, ggplot, etc., for Data Visualization. Among these, we'll go through matplotlib and seaborn.

Resources for the same are here:

- Youtube Video for matplotlib - [Matplotlib Tutorials - YouTube](#)
- Youtube video for seaborn - [Intro to Seaborn - YouTube](#)
(1 to 16)

Documentation:

- Matplotlib - <https://matplotlib.org/>
- Seaborn - <https://seaborn.pydata.org/>

Datasets for practice:

- [CarPrice_Assignment.csv](#)

Feel free to ask any of your doubts regarding any checkpoints here.

Happy Learning 🚀
