

Hello people,

It's time for the final task of your project. After creating your Machine Learning model, it's time to deploy it.

You can deploy it using flask + HTML + CSS or Tkinter. The resources for which are provided below:

FLASK -

<https://www.youtube.com/playlist?list=PLZoTAE LR MX VP Ba LN 3e-uoVRR9hIRFRfUc>

Tkinter - https://www.youtube.com/watch?v=VMP1oQOxfM0&ab_channel=edureka%21

If you want to use other modes of deployment like streamlit and Django then you are free to use them.

This would be your final checkpoint. The deadline for your final submission(every checkpoint) would be **5th February, 11:00 PM.**
